# Who Are We

I.B.A. Security Systems is a supplier of cutting edge wireless security and monitoring systems. We provide design, installation and maintenance of security systems to meet our individual customer requirements.

Our State-of-the-art Security Solutions and Innovations provide you with effective control and monitoring tools to ensure a reliable overall loss-prevention system.

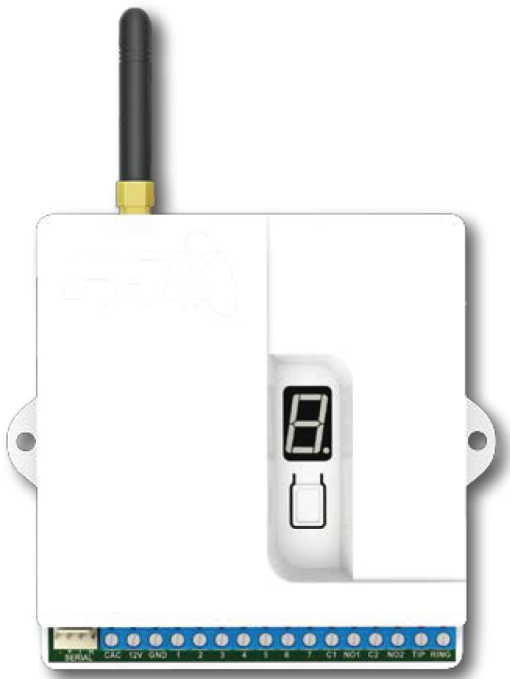

## Our Products & Services

### Multi Point Guard Monitoring System (GMS)

This wireless system is designed for real-time monitoring of guards on patrol. It caters for a maximum of 20 guards on site and up to 20 supervisors visiting the site.

You can keep your site under control remotely, as the unit is able to communicate remotely using GSM data networks, via Long Range Radio, or by sending TXT messages to up to 10 mobile numbers.

Supervisors are able to set up shift and patrol parameters. The GMU also boasts of an on-board remote control receiver for guard panic and assistance requests.

### The TX Cellular Plus

State of the art GSM/GPRS alarm transmitter that features dual network SIM functionality. It is available with either SIM card carriers or the latest chip SIMs.

- Option of Single or Dual SIM card operation for dual network reporting redundancy
- GPRS reporting to a control room
- Option of back-up SMS (to control room) if GPRS is not available
- SMS directly to cell-phones (up to 10 cell numbers)
- SMS reporting to cell phones includes zone and partition identification in plain text
- Can be configured as a simple alarm control panel.

## Complete Wireless GSM Alarm Systems

When considering a new or an upgrade to your Security Alarm System for your home or your business, our systems are the best. We offer wireless and GSM systems for your complete peace of mind.

Our system can include integrated smoke detectors, flame detectors, gas leak sensors, motion sensors, CCTV and video surveillance.
